

XM Statellite Radio has provided many hours of worthwhile news and entertainment for me. Traveling between Washington and Baltimore it has provided service beyond expectations. On trips to Richmond, Charlotte NC and other places it has provided continuous service with no dial changes which is for me a safety issue. The Instant Traffic and Weather has provided safety and planning opportunities far beyond regular stations. This is a service I gladly pay for and I believe you should support by respectfully rejecting NAB's petition 04-106. XM Radio provides the quality and programming I am willing to continue to pay monthly. Please reject this petition.
